Amendments to Claims

1. (Currently Amended) A composition consisting essentially of a thermoplastic material, said thermoplastic material selected from the group consisting of polypropylene, polyethylene, chlorinated polyethylene, polyethylene terephthalate (PET), polyamides, polysulfones, polyetherimides, polyether sulfones, polyphenylene sulfone, polyphenylene sulfide, polyacetal, polycarbonate, ethylene-tetrafluoroethylene copolymers, aromatic polyesters, grafted polyphenylene ether resin, liquid crystal polymers and mixtures thereof, containing fillers wherein said fillers comprise: (A) 1-20% by weight of graphite; (B) 4-30% by weight of a carbon fiber; and (C) 1-20% by weight of mica, said composition having a coefficient of friction of less than or equal to 0.20, wherein the weight percentages are based on the total weight of the composition, and wherein the thermoplastic material comprises at least 50 % by weight of the total composition.
2. (Withdrawn) A composition according to claim 1, further comprising (D) 0-15% by weight of a particulate polyimide.
3. (Withdrawn) A composition according to claim 2, wherein said thermoplastic material comprises 45-92 weight %.
4. (Withdrawn) A composition according to claim 3, wherein said thermoplastic material comprises preferably 50-86 weight %.
5. (Withdrawn) A composition according to claim 4, wherein said thermoplastic material comprises most preferably 65-70 weight %.
6. (Currently amended) A composition according to claim 1, wherein said thermoplastic material comprises liquid crystalline polyesters (LCPs), polyimide or polyether ketone ketone (PEKK).
7. (Previously amended) A composition according to claim 1, wherein the carbon fiber is chopped.

8. (Previously amended) A composition according to Claim 1, wherein the carbon fiber is milled.
9. (Previously amended) An article made from a composition according to Claim 1.
10. (Previously Presented) An article made from a composition according to claim 6.
11. (Previously Presented) An article made from a composition according to claim 7.
12. (Previously Presented) An article made from a composition according to claim 8.
